

“Orteil RandomGen Code Generator” User Guide

This document guides you on how to use the application “Orteil RandomGen Code Generator” to minimize the amount of work needed to be done when creating a random generator using Orteil’s RandomGen.

1. Open the file “orteil_randomgen_code_generator.exe” by going to the folder where the file is saved in after you downloaded it. Below shows how the file icon looks like (see the file circled in red).

 libssl-1_1.dll	6/28/2020 7:01 PM	Application extens...	529 KB
 orteil_randomgen_code_generator.exe	6/30/2020 3:34 PM	Application	2,242 KB
 orteil_randomgen_code_generator.exe.m...	6/30/2020 3:34 PM	MANIFEST File	2 KB

2. Below shows what is initially shown when you have double clicked the application. The text in black is the path to the executable file (which might be different in your PC).

```
D:\Python Projects\Free Time Projects\Orteil RandomGen Code Generator\dist\orteil_randomgen_code_generator\orteil_randomgen_code_generator.exe
Welcome to 'Orteil RandomGen Code Generator' by 'CreativeCloudAppDev2020'.
This tool can be used to generate Orteil RandomGen code to create your own random generator.
More information about Orteil's RandomGen is in https://orteil.dashnet.org/randomgen/?do=create.
Enter 'Y' for yes.
Enter anything else for no.
Do you want to continue using 'Orteil RandomGen Code Generator'?
```

3. If you enter anything besides ‘Y’ when you are asked something like in the screenshot above, you will quit the application.
4. If you enter ‘Y’, you will be asked to input the name of the random generator, your name, description of the random generator, link to 128 x 128 pixels picture to be included in the random generator, number of random statements you want to generate, etc related to the contents usually included in the code for creating a random generator using Orteil’s RandomGen (more information about Orteil’s RandomGen is in <https://orteil.dashnet.org/randomgen/?do=create>).
5. Next, the program will write the generated Orteil RandomGen code to a text file with the name “[name of random generator].txt” where “[name of random generator]” depends on the name of the random generator which you input.
6. You will be asked something like in the screenshot below step 2. As mentioned before, entering anything besides ‘Y’ will quit the application. Entering ‘Y’ will make the program ask you to give inputs regarding another random generator you want to create.
7. Have fun in editing your Orteil RandomGen code files in the files with format “[name of random generator].txt”.
